

Aloe Sunscreen

#617

Aloe Sunscreen

Full-spectrum protection that locks in moisture with skin-soothing aloe

Soak in those beach vibes without letting the sun's harmful rays damage your skin. Whether you're waxing up the surfboard or heading out for a day at the park, Aloe Sunscreen has your whole family covered.

With Aloe Sunscreen, you can go anywhere the sun is shining thanks to broad spectrum SPF 30 protection that guards your skin against UVA and UVB rays. UVA rays make up 95% of the radiation that reaches Earth. These rays penetrate the skin deeply and play a major role in aging and the formation of wrinkles.

UVB rays are more damaging to the skin's outer layers and cause reddening and sunburn. The effects of these rays are even more harmful when amplified by high altitude, reflective surfaces, snow and ice, in some cases doubling exposure.

Aloe Sunscreen features a breakthrough blend that includes natural non-nanosized zinc oxide with advanced coating technology. It applies easily, offers superior sun protection and goes on clear without feeling greasy or leaving any residue behind.

But it isn't just advanced sun blocking technology that makes Aloe Sunscreen such a powerful product. Pure aloe vera from Forever's own plantations nourishes the skin, locks in moisture and soothes. Only the highest quality inner leaf aloe is used to comfort and defend your skin. We've ramped up the skin-shielding power even further with vitamin E, which combats free radical damage, softens and penetrates deeper for greater moisturization.

Aloe Sunscreen is water resistant for 80 minutes. Get the full protective effect by applying generously and regularly when you're out in the sun. Whether you're climbing high toward a mountaintop or enjoying a relaxing weekend cookout, rest assured you can soak in the sun with confidence knowing the power of Aloe Sunscreen is keeping your whole family protected.
